Bramblewick Events: AI Use Policy (v2, effective September 8, 2026)

1. Approved tools
Staff may use Claude through the company Team plan only. Personal AI accounts must not be used for company or client work.

2. Data classes
Public: published schedules, marketing copy, venue addresses.
Internal: budgets, vendor quotes, internal plans.
Confidential: client contracts, pricing agreements, staff records.
Restricted: attendee personal data (names with contact details), dietary and medical needs, accessibility needs, payment details.

3. What may go into a prompt
Public and Internal data: yes. Confidential data: yes, inside a company Project, never in a chat shared outside the company. Restricted data: only after names, emails, phone numbers and other identifiers are removed or replaced with codes. Payment details: never.

4. Human review
A named person reviews before anything is sent or signed when it involves a contract or legal terms, money above $500, health, safety or accessibility, or anything published outside the company. Claude can draft these; it cannot be the final check.

5. Decisions about people
Claude may summarize or organize speaker applications, job applications or attendee requests. It must not be used to reject, rank or score people without a human making and recording the decision.

6. Connectors and Skills
Google Drive and Gmail connectors are approved for staff accounts. Any other connector, and any Skill from outside the company, needs approval from operations (Graham Pryce) before use.

7. Being open about AI
External communications drafted mostly by AI are reviewed and owned by a named staff member. We do not claim that AI-generated images are photographs of real events.

8. Questions and incidents
If something sensitive was shared by mistake, tell operations the same day. Nobody gets in trouble for reporting.
